MEMORANDUM FOR THE RECORD

SUBJECT: Visit to Casper College

The trip to Laramie County Community College and Casper College in Wyoming was successful. On the morning of October 19 I spoke to approximately 80 students at the former college in Cheyenne and answered their questions. Professor William Guffey who is also an elected representative in the Wyoming House of Representatives was my host. Following that appearance and lunch at the campus, I drove to Casper with Professor Cecil (Scott) Jones. That evening I spoke before a combined group of students from at least two of Jones' political science and international relations courses about CIA and intelligence. There were about 100 in attendance including the students and others who appeared to be parents and friends of the students, and faculty at Casper College.

Both appearances were successful. Questioning was sharp and comprehensive but in all cases friendly.
